

# Then & Now

**F**or over 100 years, Westinghouse has designed and manufactured electric motors for a wide variety of industries. Today, our name may have changed, but our commitment to quality and reliability remains at the top of our priorities. We apply this same commitment to renewal parts.

With access to over 400,000 original designs and drawings to

Westinghouse motors and generators, TECO-Westinghouse Motor Company is your sure source for genuine Westinghouse and TECO-Westinghouse renewal parts.

***Trust the Power***

**TECO**   **Westinghouse**

Headquartered in Round Rock, Texas, TECO-Westinghouse Motor Company's After-Market Services Group supplies direct replacement parts and components and a broad variety of technical services that can be of great economic value to owners of large Westinghouse motors. Customers worldwide can rely on the After-Market Services Group for assistance on form wound, medium voltage and high voltage (through 13.8 KV) motors ranging from 200 HP to over 80,000 HP.

## Over 400,000 Westinghouse and TECO-Westinghouse Motor Designs On File

With direct access to original designs and drawings for more than 400,000 Westinghouse and TECO-Westinghouse large motors and generators, plus the latest technologies in manufacturing, service and engineering, the After-Market Services Group is the only genuine OEM source for Westinghouse large motor parts, components and services.

## On-Site Technical Assistance

TECO-Westinghouse Field Service Representatives are available to provide technical assistance on-site for problem diagnosis and resolution, as well as accurate determination of replacement parts and maintenance needs. Start-up assistance and customized training are also available.

## Design Engineering and Consultation

A team of experienced design engineers is available to perform design analysis and evaluation for modifications, application and maintenance problem resolution, upgrades, reapplication, and redesign and remanufacturing to new ratings. Engineering studies can be performed to provide technical analysis and guidance for a broad variety of owner needs.

## Drop-In Replacement Components and Assemblies

With original designs and drawings on file, TECO-Westinghouse can manufacture complete drop-in replacements for major components such as:

- Rotors and wound stators for AC and synchronous machines
- Armatures and field frames for DC machines
- Field pole assemblies for synchronous and DC machines
- Replacement cooling/ventilation packages -WPII, TEWAC and TEAAC

Repair or service can be completed without shutting down existing equipment and in advance of scheduled outages to minimize downtime for component change out. This allows motor owners to control outage time and extend motor life without the inconvenience and economic loss incurred when a critical motor failure forces unscheduled downtime.
